Comprehensive solvency surplus	1,964,586,939	1,888,154,504
Comprehensive solvency ratio	246%	243%

2. Liquidity risk regulatory indicator

(RMB: 1 Yuan, %)

Indicators	Current quarter	Previous quarter
Actual net cash flow	301,071,387	-64,771,687
Consolidated Liquidity Ratio		
Within 3 months	247%	89%
Within 1 year	80%	103%
Above 1 year	127%	178%
Liquidity Coverage Ratio		
Stress scenario 1	312%	2254%
Stress scenario 2	391%	10537%
Liquidity coverage of independent accounts for investment products	Not applicable	Not applicable

**Stress scenario 1 is under the assumption that the cash outflow of reinsurance business in the forecast period is 50% higher than that in the basic scenario.*

**Stress scenario 2 is under the assumption that the 20% principals and interests of fixed income assets can not be recovered within the forecast period.*

Net cash inflow in this quarter is RMB 301 million constituted by RMB 617 million received from reinsurance business, 446 million for purchasing government bonds and other cash inflow and outflow of business operation and investment activities are in line with the expectations. There was no cash flow from financing activities during this quarter. The consolidated liquidity ratios for 3 months, 1 year and above 1 year were 247%, 80% and 127% respectively. Compared to the previous quarter, the consolidated liquidity ratios for 3 months increased 158%. The consolidated liquidity ratio for 1 year and above 1 year decreased 23% and 51% respectively, mainly because of government bonds that due in 3 months increasing 1,410 million during this quarter.

Shanghai branch holds enough high-quality liquidity assets consist of cash and government bonds, so the liquidity coverage ratios keep high.

3. Operating indicator

(RMB: 1 Yuan)

Indicator	Current quarter	Current year
Premium	1,662,854,937	3,078,542,182
Net profit	6,762,279	145,775,407
Net assets	1,353,770,585	1,353,770,585

IV. Integrated Risk Rating Indicator

GRAG Shanghai branch was classified as category A in Q1 2020 CBIRC integrated risk rating (IRR) evaluation.

V. Solvency Risk Management Capability

1. Latest score of solvency risk management capability

In November 2018, GRAG Shanghai branch received the "Notice on the Results of the SARMRA Assessment of 2018" issued by the China Banking and Insurance Regulatory Commission. The SARMRA evaluation score of our Company in 2018 was 79.07. Among them, risk management foundation and environment 17.24 points, risk management objectives and tools 7.23 points, insurance risk management 7.78 points, market risk management 7.61 points, credit risk management 8.37 points, operational risk management 8.17 points, strategic risk management 7.30 points, reputation risk Management 7.46 points, liquidity risk management 7.93 points.

2. Improvements of solvency management

General Reinsurance AG is committed to an integrated approach to risk management which forms the basis of a company-wide understanding of all risks that impact the organization and ensures that conscious risk management is part of the daily decision-making processes of every member of our staff.

GRAG Shanghai Branch established a risk management mechanism applicable to the Shanghai branch under the framework of the risk management of the head office to achieve the overall goal of solvency management with appropriate risk management methods and tools based on the company's strategy and business objectives.

To improve the risk management capability, Gen Re Shanghai Branch carefully analyzed the gap between evaluation result of solvency risk management capability in 2018 and annual self-assessment result. Meanwhile, considering the time, manpower, material resources and other aspects that need to be invested to determine the priority of rectification matters. Besides, the risk management system can be improved from aspects of policies soundness and implementation effectiveness.

In current quarter, the risk management department and legal department took the lead in reviewing and improving the solvency risk management system, including Related Party

Transaction Measure and Investment Guideline, etc. At the same time, the work processes required for the operation of risk management was also improved in a timely manner.

VI. Regulatory measures taken by regulatory authorities

None.

The difference is...the quality of the promise.
